SUMMARY

Experienced software engineer with a Bachelor's degree in Business Information Systems and over 7 years of experience in software development. Proficient in JavaScript, React.js and Node.js, with a strong background in developing and integrating AI-powered applications. Skilled in frontend and backend development, state management, and cloud server deployment. Eager to contribute to the company technical skills and innovative solutions.

EXPERIENCE

Pokko (pokkopocket.com), ***Founder & Solo Developer (Personal Project)***
Aug 2026 - Present
• Designed and built Pokko from scratch, an AI-powered personal drive and assistant: drop in any file and it sorts itself, then retrieve documents such as passports and IDs from any device • Built native apps for macOS (Swift/SwiftUI menu bar app), iOS (SwiftUI with Share extension) and Android (Kotlin/Jetpack Compose) • Integrated multiple AI backends (Claude, Gemini, Ollama, OpenAI-compatible) with tool calling, file and image attachments, voice input (Whisper, on-device speech recognition) and natural text-to-speech (Kokoro) • Built the backend on Supabase (Postgres, Auth with Sign in with Apple, Edge Functions) serving a hosted Claude model with per-user spend budgets and rate limits, keeping provider keys off the device • Implemented encrypted memory sync across Mac, iPhone and Android with a user-held key • Built the marketing website on Vercel and automated release scripts for TestFlight/App Store; wrote design specs and implementation plans, with unit and UI test coverage on every platform

AirAsia Philippines, Inc, ***Senior Software Engineer***
Nov 2022 - Present
• Develop & contributed on food delivery, dine-in, dutyfree, hotels app - AirAsia • Use Reactjs/React Native technology for frontend development • Redux/Sagas Toolkit for state management • Daily use of git, review codes before merging • Daily SCRUM, confluence, gitlab • Leveraged AstroJS to architect hybrid rendering (SSG, SSR, CSR) for optimal performance, SEO, and dynamic interactivity across web applications • Architected and developed MoveTix app from scratch using Expo and Expo + Next.js to achieve unified cross-platform codebase

Indra Philippines, Inc, ***Fullstack Developer***
Oct 2021 - Nov 2022
• Develop back office app - AirAsia • Use Reactjs/React Native technology for frontend development • Redux Toolkit for state management • Nodejs backend • Daily use of git, review codes before merging • Daily SCRUM, confluence, gitlab

Indra Philippines, Inc, ***Fullstack Developer***
Dec 2019 - Jan 2021
• Develop OurDaily app - AirAsia (airasia.com/explore) • Use Reactjs technology for frontend development • Use linting & Jest/Enzyme for frontend testing • Nodejs backend & mocha for testing • Daily use of git, review codes before merging • Daily SCRUM, confluence, gitlab

Jump Digital Asia Pte. Ltd, ***Web Engineer***
Jul 2018 - Apr 2019
• Developed full-stack web applications using React.js (ES6), GraphQL, Ruby on Rails, and Python Django 2.1 • Managed MySQL database creation and administration • Deployed and configured cloud servers on Linode with Linux (Ubuntu, Debian, CentOS) • Configured web servers (Apache, nginx) and implemented SSL certificates for secure connections

Ministry Of Municipality & Environment(CGIS), ***4th Line Technical Support / System Admin***
Nov 2015 - Feb 2018
• Provided technical support including PC assembly, OS installation, network configuration, and user software troubleshooting
• Administered Windows Server 2012, Active Directory, Oracle Solaris 11.3, and Oracle 12c databases (user management, permissions, patching) • Designed technical infrastructure diagrams for CGIS Unix server environment; operated SAN storage (LUN creation, file servers) • Monitored servers using Oracle Cloud Control 13c and managed backups with HPE Data Protector
• Developed custom CMS with MySQL/Oracle databases and managed AutoCAD license server • Coordinated with government agencies to resolve Unix server connectivity issues

Ooredoo - Connections MIddle-east, ***Fiber Optic OSP Network Supervisor***
Oct 2012 - Oct 2014
• Supervised subcontracted fiber optic installation, civil work, and OSP construction, ensuring projects met scope, budget, and timeline requirements • Monitored and reported subcontractor performance, conducted quality audits, and implemented improvements to workmanship standards • Served as primary point of contact for service providers, managing queries, change requests, and issue resolution • Defined deployment standards and specifications for In Building Cabling program, coordinating with Commercial team on landlord agreements • Trained and managed fiber splicers on proper use of OTDR, locating equipment, and facility protection procedures • Maintained OSP network security and coordinated with carriers, government agencies, and building owners on network expansions

QTEL(Qatar Telecom) - Connections MIddle-east, ***Fiber Optic Support***
Jun 2010 - Sep 2012
• Managed fiber optic work orders from receipt to completion: sorted, distributed to engineers, and maintained updates in TELECORDIA, CRM, and cable management systems • Prepared BOQ and RFQ documentation, assisted with ODF verification, and scanned/archived project diagrams with completion reports • Coordinated with engineering, purchasing, and supervisors on fiber cable damage documentation and PO approvals • Maintained daily system updates across Remedy, TELECORDIA, and cable systems to support efficient fiber optic operations

EDUCATION

University of Portsmouth
Bachelor of Science (Honors) • ***Business Information Systems*** • *Jun 2017 - Nov 2018*

APTECH Computer Education Center
Advanced Diploma • ***Software Engineering*** • *Dec 2009 - Sep 2010*

APTECH Computer Education Center
Professional Diploma • ***Software Engineering*** • *Jan 2009 - Nov 2009*

APTECH Computer Education Center
Higher Diploma • ***Software Engineering*** • *Aug 2006 - Aug 2007*

APTECH Computer Education Center
Diploma • ***Information Systems & Management*** • *Aug 2006 - Aug 2007*

Philippine International School Qatar
High School Diploma • *Jun 2001 - Mar 2005*

SKILLS

improve the existing applications • develop new software solutions • enhance my programming and analytical skills
